CORE SERVICES

ENGINEERING FOR HEAVY INDUSTRY.

SM Engineering Industries is a fabrication and reclamation workshop in Raigarh, Chhattisgarh. From our 86,000 sqft campus we deliver welding, hardfacing and custom fabrication to drawing, in MS, SS, Wear Plate, Rockhard and Hardox, along with refractory anchors and SS shields for IBR pipelines.

As an **Authorised Reclamation Services Workshop of D&H Secheron**, our welding and hardfacing work is carried out under the supervision of the D&H Secheron Service Team. We are a sister company of **Gomati Enterprises**, an authorised industrial distributor serving the same plants since 1996.

We restore and extend the life of high-wear industrial components, and fabricate new ones precisely to your specification.

MINING

HEAVY
EQUIPMENT

Four core capabilities for the steel, power, cement and mining sectors, delivered under D&H Secheron Service Team supervision and fabricated to your drawing.

01 CUSTOM FABRICATION AS PER DRAWING

Precision fabrication to your specification, from single components to large outdoor structures. Plates are cut on our 12 KW laser and formed on hydraulic bending and pressing equipment, with machining and finishing done on the same campus.

MS

SS

WEAR PLATE

ROCKHARD

HARDOX

02 WELDING, REPAIRING & HARDFACING

All types of welding, repairing and hardfacing jobs, carried out under the supervision of the D&H Secheron Service Team. As an authorised reclamation services workshop, we restore and extend the life of high-wear industrial components rather than leaving replacement as the only option.

03 SS SHIELDS FOR IBR PIPELINES

Stainless steel shields for IBR pipelines in power plants, produced on dedicated shield-manufacturing presses in all SS grades.

04 REFRACTORY ANCHORS

Manufactured in-house on dedicated power presses in all SS grades and special grades, to standard and custom profiles for furnaces, boilers and process equipment.

SEND US YOUR DRAWING. WE'LL QUOTE IT.

SALES@SMEI.CO.IN

300-Ton Hydraulic Press	7 ft & 28 ft Semi-automatic Lathes
Power Presses for Anchor & Shield Manufacturing	Two 10-Ton EOT Cranes
In-house Shot Blasting & Painting Facility	Bandsaw Machine

AND MORE

ONE GROUP. SUPPLY AND ENGINEERING.

Gomati Enterprises is an authorised distributor of industrial products in Raigarh, started in 1996 by Mr. Manoj Agrawal. Its first breakthrough was the L&T Switchgear dealership for Raigarh, a relationship now in its 25th year under the Lauritz Knudsen name.

Today the firm holds five authorised dealerships concurrently and supplies major steel, power, cement and mining plants across the region. SM Engineering Industries was set up under the same ownership to add manufacturing to that platform.

One accountable group for both material and workmanship. The D&H Secheron consumables used in our reclamation work are stocked and supplied by our own sister company.

WHY WORK WITH US

01

Authorised D&H Secheron Workshop

Welding and hardfacing supervised by the D&H Secheron Service Team, with their consumables and procedures.

02

A Complete Line In-house

Laser cutting, forming, machining, blasting and painting on one campus. No outside processes, no handover delays.

03

The Right Materials

MS, SS, Wear Plate, Rockhard and Hardox, matched to the wear conditions of your application.

04

Backed by Gomati Enterprises

Our sister company has supplied the region's plants since 1996. Supply on one side, on-ground engineering on the other.
